		Swiss Security Number:	127473875
SSPA Code	1300 (as defined in the SSPA Swiss Derivative Map)	Underlying Index	Capeo Global Balanced Index
Issue Price	USD 100.00	Issue Size	Up to 100'000 Product(s) (can be increased at any time)
Settlement Currency	USD	Settlement Type	Cash Settlement
Initial Fixing Date	22/09/2023	Issue Date	29/09/2023
Final Fixing Date	Open-end or, in case of an exercise of the Issuer's Termination Right, as specified in the Issuer's Termination Announcement or in case of an exercise of the Investor Redemption, the day for which the Product Administrator receives the duly signed Redemption Notice (subject to Market Disruption Event provisions).	Redemption Date	The 5th Business Day following the Final Fixing Date and subject to Settlement Disruption Event provisions.

Product Description

The Product replicates the price movements in the underlying Index (adjusted by the Units, and the Management Fee) and is therefore in terms of risk comparable to a direct investment in the underlying Index. On the Redemption Date, the Investor will receive a Cash Settlement in the Settlement Currency, as further described under Redemption.

Index description: The underlying Index is a dynamic, active index (the "**Index**") managed by the Index Sponsor at its discretion. The Index Administrator validates and coordinates the dissemination of information regarding changes to the Index and directs the Investment Manager to act accordingly. The Index Components (the "**Components**") of the Index may be rebalanced by the Index Sponsor on a regular basis, subject to the Index Administrator's veto right. The Index Sponsor determines and is responsible for the composition of the Index and may add, replace or remove Components in accordance with a set of predefined rules set forth in the Index Rule Book ES3P6D, dated 10/08/2023 (the "**Index Rule Book**"). The Index Calculation Agent shall adjust and calculate the Index Value in accordance with the mechanism described in the Index Rule Book.

Objective: Capeo Global Balanced Index is an Index that invests in top performing mutual managers and ETFs in a long only strategy which has a balanced profile. The Index invests in bonds, equities and alternative investments. The target investment horizon is 3-7 years or medium to long term. The Index uses no leverage or derivatives and has no performance fee.

Universe: The Index universe consists of eligible Index Components which may include Mutual Funds, Hedge Funds or Alternative Funds, ETFs and Cash Instruments as determined by the Index Sponsor and subject to the restrictions defined in the Index Rule Book.

Distributions: Net distributions with respect to Components (after deduction of any expenses and taxes) will lead to an adjustment of the Index Units (as specified in the Index Rule Book).

The Index represents a hypothetical portfolio. There is no obligation of the Index Calculation Agent, the Issuer or any other party to purchase and/or hold any Components and there is no actual portfolio of assets to which any person is entitled or in which any person has an ownership interest. The Index consists of Components, the performance of which will be used as a reference point for the purposes of calculating the value of the Index. The Issuer shall be free to choose how to invest or further proceed with any proceeds of the issuance of the Product. References to any rebalancing of the Index or addition, adjustment, substitution, replacement or removal of Components should not be construed as imposing an obligation on the Issuer, the Index Calculation Agent or any person to acquire or dispose of any securities, investments, assets or other property but are references to the change in, and relate solely to the calculation of, the value of the Index, which is relevant for the determination of any amount payable in respect of the Product.

Upon request, the Index Rule Book and the latest composition of the Index are available free of charge from the Index Calculation Agent (CAT Financial Products AG, Tessinerplatz 7, 8002 Zurich, Switzerland).

Index Value _t	The last available value of the Index on Scheduled Trading Day _t as published and as reasonably determined by the Index Calculation Agent.
AMF _t	The Accrued Management Fee on Scheduled Trading Day _t is determined by the Index

Calculation Agent as follows:

$$AMF_t = AMF_{t-1} + \text{Value}_{t-1} \times MF \times \text{Day Count}_t \text{ and } AMF_0 = 0.00$$

Day Count _t	Actual number of calendar days between Scheduled Trading Day _{t-1} to the current Scheduled Trading Day _t , divided by 360.
Scheduled Trading Day _t	Means any calendar day on which the Index Calculation Agent is scheduled to publish a value for the Underlying. The Initial Fixing Date corresponds to Scheduled Trading Day ₀ and for any subsequent Scheduled Trading Day variable t is incremented by one (1).
Issuer Termination Right	The Issuer has the unconditional right to call the outstanding and issued size for early redemption (the “ Termination Right ”) at any time with a 10 Business Days (prior to the respective Final Fixing Date) notice by announcement (the “ Termination Announcement ”) published on www.cuglos.com . The Termination Announcement will specify the adjusted Final Fixing Date and the adjusted Redemption Date. Following the announcement, the Product will be redeemed on the adjusted Redemption Date for an amount in the Settlement Currency that equals the Value _t on the communicated adjusted Final Fixing Date, as determined by the Product Calculation Agent.
Investor Redemption Right	Each Investor has an annual right, first time on the anniversary of the Issue Date (such day being the “ Announcement Date ”; following Business Day Convention will apply) to call, the portion of the outstanding size in which they are invested to, for redemption (taking into account any Minimum Redemption Number, if such is applicable as stated under “General Information” herein), by delivering a duly completed and signed Redemption Notice to the Product Calculation Agent (notice to be received by the Product Calculation Agent no later than 07:00 am CET/CEST, 10 Business Days preceding the respective Announcement Date). Swiss Taxation

Swiss Federal Stamp Duty	For Swiss stamp duty purpose, the Product is treated as analogous to a share/unit in a foreign investment fund. Therefore, primary and secondary market transactions are in principle subject to Swiss stamp duty (TK24).
Swiss Income Tax (for private investors with tax domicile in Switzerland)	<p>For Swiss income tax purposes, the product is treated analogously to a share/unit in an investment fund. All reinvested dividend and interest income from the Underlying are subject to income tax. The taxable income (if any) generated by the Product will be reported annually to the Swiss Federal Tax Administration. For private investors with tax domicile in Switzerland who hold the Product as private assets, the reported income (if any) is subject to direct federal tax. Any dividend payments are subject to direct federal tax on the respective payment date.</p> <p>If no tax reporting is available, the taxable income is determined based on a fair market return, taking into account the asset classes of the Underlying.</p> <p>The tax treatment for cantonal and municipal income taxes may differ from the tax treatment for direct federal tax. In general, however, the income tax treatments are the same.</p>
Swiss Withholding Tax	The Product is not subject to the Swiss Withholding Tax.

The Swiss tax information provided herein is a non-binding summary and only provides a general overview of the potential Swiss tax consequences linked to this Product at the time of issue. Swiss tax laws and administrative practice may change, possibly with retroactive effect.

Investors and prospective Investors are advised to consult with their Swiss or foreign tax advisers with respect to the Swiss or foreign tax consequences of the purchase, ownership, disposition, lapse or exercise or redemption of a Product in light of their particular circumstances. The Issuer and the Paying Agent hereby expressly exclude any liability in respect of any possible Swiss or foreign tax consequences.

Prospects for Profit and Loss

This product falls within the category “Participation Products”. The profit the Investor could realize with this Product at redemption is unlimited (except for bearish products and products with the special feature “capped participation”). The redemption amount is directly linked to the performance of the Index Component(s), taking into account any participation rates or other features.

On the downside the Investor is exposed to the development of the Index Component(s). This might lead to a partial or even a total loss of the investment.

Please refer to the sections “Product Description” and “Redemption” for more detailed information on the characteristics of this Product.

Significant Risks for Investors

Prospective Investors should ensure that they fully understand the nature of this Product and the extent of their exposure to risks and they should consider the suitability of this Product as an investment in the light of their own circumstances and financial condition. Products involve a high degree of risk, including the potential risk of expiring worthless. Potential Investors should be prepared in certain circumstances to sustain a total loss of the capital invested to purchase this Product as well as the transaction costs. Prospective Investors shall consider the following exemplary selection of important risk factors and read the section “Risk Factors” of the Base Prospectus for details on all other risk factors to be considered.

This is a structured product involving derivative components. Investors should make sure that their advisors have verified that this Product is suitable for their portfolio taking into account the investor's financial situation, investment experience and investment objectives.

The Conditions of the Product may be subject to adjustments during the lifetime of the Product as set out in the Base Prospectus.

Product Specific Risks: Investors may lose some or all of their investment as well as the transaction costs as they are fully exposed to the performance of the Underlying Index. The Product does not confer any claim to receive rights and/or payments of the Underlying Index, such as dividend payments, unless explicitly stated in the documentation governing the Product. Please refer to the Product Documentation as regards the further Product specific risk factors to be taken into account.

Issuer Risk: Investors are exposed to the credit risk of the Issuer. If the Issuer is not able to make a payment or becomes insolvent, investors could lose some or all of their investment.

Market Risk: Market risk may have a negative impact on the value of and the return on an investment in the Product. Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term. Market risk may also lead to an early redemption of the Product (e.g. in the event of a hedging disruption).

Liquidity Risk: The Issuer or a third party appointed by the Issuer, intends to act as market maker in relation to the Product and it will use commercially reasonable efforts to provide indicative bid and offer prices for the Product on a regular basis under normal market conditions. However, such market maker does not have an obligation to provide prices for the Product. Liquidity of the Product in the secondary market may be limited and an active trading market for the Product may not develop. Accordingly, investors may not be able to sell their Product.

Currency Risk: If the investor's reference currency is different from the currency, in which the Product is denominated, the investor bears the currency risk between the two currencies. The fluctuations in exchange rates could have an adverse effect on the value of or return on an investment in the Product, even if the redemption amount would otherwise provide for a positive return. If the Index Component(s) are calculated in a currency different from the Settlement Currency, the conversion into the Settlement Currency will be carried out at the relevant exchange rate.

Early Termination and Reinvestment Risk: The Product may be redeemed prior to its maturity (be it by declaration of the Issuer or as a result of certain events specified in the terms of the Product) and Investors must consider that in case of such an early redemption, investors will not receive any further coupon payments after the occurrence of the early redemption and the early redemption amount may be significantly below the issue / purchase price paid and the redemption amount payable at maturity. Investors may not be able to reinvest the early redemption amount in a financial instrument with the same profit potential and additional transaction costs may be incurred as a consequence of a reinvestment of the early redemption amount.

Illiquidity of Underlying: One or, if applicable, more of the Index Component(s) might be or become illiquid over the lifetime of the Product. Illiquidity of an Index Component might lead to larger bid/offer spreads of the Product and/or to an extended time period for buying and/or selling the Index Component respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/or a modified redemption amount, as reasonably determined by the Index Calculation Agent.

Conflict of Interests: The Issuer and the Principal Parties and/or any third party appointed by them, as the case may be, may from time to time, as principal or agent, have positions in, or may buy or sell, or make a market as well as be active on both sides of the market at the same time in any securities, currencies, financial instruments or other assets underlying the Product to which this document relates. The Issuer's and Principal Parties' and/or the appointed third party's trading and/or hedging activities related to this Product may have an impact on the price of the Component(s).

Remunerations to Third Parties: Depending on the circumstances the Issuer and/or the Principal Parties may sell this Product to financial institutions or intermediaries at a discount to the Issue Price or reimburse a certain amount to such financial institutions or intermediaries (reference is made to section "General Information" or "Fees" herein).

In addition, for certain services rendered by distribution partners and to increase quality and services relating to the Product, the Issuer and/or the Principal Parties may from time to time pay trailer fees to such third parties.

Further information is available on request.

Tax Impact: There may be a tax impact on investing in the Product. The Issuer and the Principal Parties do not provide any tax opinion. Any Investor should consult with its own tax advisor prior to investing in the Product. In addition, Investors should be aware that taxation with respect to the Index Component(s) and therefore, this Product may (adversely) change

over the lifetime of the Product. In accordance with the General Terms and Conditions the Issuer and the Principal Parties have the right, but not the duty, to withhold or deduct any such taxes, duties, fees and/or charges.

Foreign Exchange Risk: The Investor in the Product is exposed to foreign exchange rate risk if the currency of the Index Component(s) and Settlement Currency are not identical.

Role of the Index Administrator and Index Calculation Agent: CAT Financial Products AG acts as Index Administrator and Index Calculation Agent in respect of the Underlying Index. In these capacities, it may amend or discontinue the Index Rule Book, is under no obligation to take into account the interests of an Investor of the Products.
